Girls Exploring Together - Information Technology

A Technology Club for Middle & High School Girls

Since 2005, the Michigan Council of Women in Technology (MCWT) Foundation's GET-IT technology clubs have striven to correct the gender disparity gap in the tech field. We do so by providing middle and high school female students with a supportive environment and interesting activities that educate and empower them to successfully learn a variety of computing technologies.

Benefits to Students:

- Social acceptance among like-minded peers
- Opportunity to develop skills and confidence in a growing career field
- Exposure to Michigan technology companies and female tech professionals
- Access to engaging, interactive technology curriculum in areas including:
    - HTML/CSS/Website Design and Coding
    - Mobile App Creation and Robotics
    - Cyber Security

SCAN

School/District Requirements:
· One coach for every 15 students
